

Claims:

1. Sleeping bag for children, having a bottom part (12), which, at its free end, an edge is extended to form an upper end wall or a collar (13) and which is connected to a supplementary part (26), in such a way that a lower closed bag is formed, as the supplementary part (26) defines a head opening with the upper end wall or the cap-forming part (13), and where a zipper (24, 30) is arranged for replacement of a part of the sleeping bag for children, with a part having a different size, to be able to vary the size of the said sleeping bag, **characterized in**
- that the supplementary part (26) is connected to the bottom part (12) by a full length zipper (24, 30), in such a way that the supplementary part (26) may be removed, and
 - that it comprises an alternative, second supplementary part (33), having a bag-shaped main part (35) and on one side, a tongue (41),
 - a zipper (40), corresponds to the zipper (24) on the bottom part (12), extends round the mouth of the bag-formed extension (35) and along the sides of the tongue (41), in such a way that the second supplementary part may be fastened to the bottom part.
2. Sleeping bag for children according to claim 1, **characterized in** that the first supplementary part (26) along the zipper (30), has a collar (28), having a width, which is increasing from the ends of the zipper (30), towards the bottom of the bag.
3. Sleeping bag for children according to claim 1 or 2, **characterized in** that it is provided with a pocket (16) for accommodating strings and similar items which can be closed, unintentional especially by means of velcro, so its opening by a child is prevented.
